

Step 5: Edit and publish closed captioning

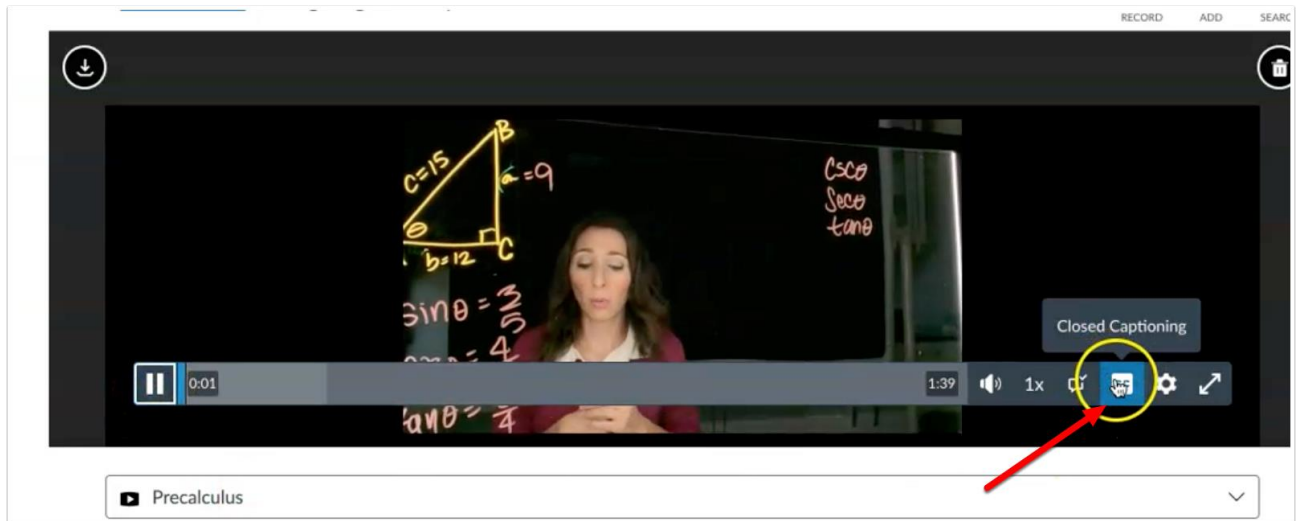

1. Once you have received notification that your request for Closed Captioning is complete, you will be able to read the transcript and make any necessary edits before you publish the transcript for all viewers to read.

2. When you select "Review & Publish" you will be taken to an editing screen where you can see the breakdown of the transcript by second. In this screen, you can play your video and read the transcript to see if there are any errors or corrections that need to be made. Type into the box that you would like to edit, and begin typing. When you are done editing the entire transcript, select "Publish".

3. Once you have published the transcript, viewers will be able to select the "CC" icon in the video to view the Closed Captioning.

4. After they select "CC", they will select the language ("English") and then the Closed Captioning will appear.
