

## Step 6: Download Your Swivl Recording to Your Desktop

When you have finished recording on the Swivl, you will want to download your recording onto your desktop so that you can make edits and then upload the edited video into your Canvas course. Follow the steps below to download your recording onto your desktop.

1. Login to your Swivl app by going to [cloud.swivl.com/login](https://cloud.swivl.com/login).

Be sure to use the same Swivl account that was used on the iPad/iPhone to record the lesson otherwise you will not see your recordings.
